CONTENTS

J. Adem: On the axially-symmetric steady wave propagation in elastic circular rods 261
Max Anliker (*see Andreas Troesch*)
G. K. Batchelor: Heat transfer by free convection across a closed cavity between vertical boundaries at different temperatures 209
Richard Bellman and Ralph H. Pennington: Effects of surface tension and viscosity on Taylor instability 151
Thomas C. Benton (*see Samuel I. Plotnick*)
Garrett Birkhoff and John M. Walsh: Note on maximum shock deflection. . . . 83
G. Birkhoff: Note on Taylor instability 306
H. D. Block: A remark on integral invariants 201
S. R. Bodner: The post buckling behavior of a clamped circular plate 397
Hans Bückner: A note on my paper "A formula for an integral occurring in the theory of linear servomechanisms and control-systems" 206
G. F. Carrier: The mechanics of the Rijke tube 383
Tse-Sun Chow: On the average second moment of the energy spectral intensity . 287
H. Cohn (*see J. H. Giese*)
S. Corrsin: A measure of the area of a homogeneous random surface in space . . 404
C. N. De Silva (*see P. M. Naghdi*)
J. B. Diaz and G. S. S. Ludford: On two methods of generating solutions of linear partial differential equations by means of definite integrals 422
R. C. DiPrima and G. H. Handelman: Vibrations of twisted beams 241
C. L. Dolph: On the Timoshenko theory of transverse beam vibrations 175
R. L. Evans: Errors in asymptotic solutions of linear ordinary differential equations 295
Aaron Fialkow and Irving Gerst: The transfer function of networks without mutual reactance 117
A. Fialkow and I. Gerst: Impedance synthesis without mutual coupling 420
Bernard Friedman and Joy Russek: Addition theorems for spherical waves . . . 13
P. R. Garabedian: An integral equation governing electromagnetic waves 427
I. Gerst (*see A. Fialkow*)
J. H. Giese and H. Cohn: Canonical equations for non-linearized steady irrotational conical flow 351
H. J. Gray, Jr: Numerical methods in digital real-time simulation 133
G. H. Handelman (*see R. C. DiPrima*)
V. G. Hart: Equilibrium of membranes elastically supported at the edges 408
N. J. Hoff: Approximate analysis of structures in the presence of moderately large creep deformations 49
G. Horvay and F. N. Spiess: Orthogonal edge polynomials in the solution of boundary value problems 57
J. Keilson: On diffusion in an external field and the adjoint source problem . . . 435
Julian Keilson: A suggested modification of noise theory 71
Herbert B. Keller and Joseph B. Keller: Lowest eigenvalues of nearly circular regions 141
Joseph B. Keller (*see Herbert B. Keller*)
B. Lehnert: The decay of magneto-turbulence in the presence of a magnetic field and Coriolis force 321
H. C. Levey: Two dimensional source flow of a viscous fluid 25

E. Levin: Note on the circle theorem of hydrodynamics 315
G. S. S. Ludford (*see J. B. Diaz*)
A. R. Manwell: A new singularity of transonic plane flows 343
John W. Miles: On the transformation of the linearized equation of unsteady supersonic flow 1
M. Mitchner: An approximate solution to the Navier-Stokes equations 401
G. W. Morgan: On the non-steady motions of a rigid body in an ideal fluid . . . 277
P. M. Naghdi and C. N. De Silva: On the deformation of elastic shells of revolution 369
H. Nyquist, S. O. Rice and J. Riordan: The distribution of random determinants . 97
Wilhelm Ornstein: Stress functions of Maxwell and Morera 198
S. I. Pai: On a generalization of Synge's criterion for sufficient stability of plane parallel flows 203
P. Parzen: Electromagnetic wave propagation in bounded electron beams . . . 309
C. E. Pearson: Corrections in hot-wire correlation measurements 235
Ralph H. Pennington (*see Richard Bellman*)
Samuel I. Plotnick and Thomas C. Benton: Evaluation of constants in conformal representation 76
W. Prager (*see E. W. Ross, Jr.*)
J. R. M. Radok: The solution of eigenvalue problems of integral equations by power series 413
S. O. Rice: Distribution of the extreme values of the sum of n sine waves phased at random 375
S. O. Rice (*see H. Nyquist*)
J. Riordan (*see H. Nyquist*)
E. W. Ross, Jr. and W. Prager: On the theory of the bulge test 86
Joy Russek (*see Bernard Friedman*)
E. J. Scott: Wave propagation in a visco-elastic medium 300
H. Serbin: Numerical quadrature of some improper integrals 188
Ting Kuan Shu-Chuang: A note on the numerical solution of the equation $x^m \times ax^n \times b = 0$ 313
H. A. Simon: Some properties of optimal linear filters 438
F. N. Spiess (*see G. Horvay*)
M. M. Stanišić: Free vibration of a rectangular plate with damping considered . . 361
A. F. Stevenson: Note on the existence and determination of a vector potential . . 194
H. S. Tan: A unique law for ideal incompressible flow with preserved pattern of finite separation 78
L. Tasny-Tschiassny: Asymmetrical finite difference network for tensor conductivities 417
L. Trilling: The boundary layer on a quarter infinite flat plate 80
Andreas Troesch, Max Anliker and Hans Ziegler: Lateral vibrations of twisted rods 63
John M. Walsh (*see Garrett Birkhoff*)
G. B. Whitham: A note on a paper by G. C. McVittie 316
S. V. Yadavalli: On some effects of velocity distribution in electron streams . . . 105
C. S. Yih: Stability of two-dimensional parallel flows for three-dimensional disturbances 433
Hans Ziegler (*see Andreas Troesch*)
